

CISPA-Stanford Center

FOR CYBERSECURITY

The CISPA-Stanford Center for Cybersecurity is inviting applications for its

Elite Research Career Program

offering

Postdoctoral & Faculty Positions (m/f) in Cybersecurity.

The **CISPA-Stanford Center for Cybersecurity** was established as a joint program by CISPA–Helmholtz-Zentrum i.G. (former the Center for IT-Security, Privacy and Accountability at Saarland University) and Stanford University in 2016 and is supported by the German Federal Ministry of Education and Research (BMBF).

The **Elite Research Career Program** intends to offer the very best postdoctoral cybersecurity researchers a unique career path at two of the leading cybersecurity institutes in the world. The program consists of three consecutive phases:

- a preparatory 1-2-year postdoctoral phase (Phase P) at CISPA, followed by
- a 2-year appointment at Stanford University (Phase I) as a visiting assistant professor, followed by
- a 3-year position at CISPA as a independent research group leader (Phase II).

Applicants to the program must have completed a distinguished PhD and demonstrated their potential to become future leaders in their field of research. Outstanding candidates are considered for fast track tenure-track positions at CISPA after their return from Stanford.

Applicants should submit their CV, copies of their school and university reports, a list of publications highlighting their five most relevant ones, names of 3-5 references, a brief description of their previous research, and a research proposal outlining their research vision. Please send them as a single PDF file to: application@cispa-stanford.org.

Application deadline: February 28, 2019.

The CISPA-Stanford Center for Cybersecurity is an equal opportunity employer and women are encouraged to apply. Applications of severely disabled candidates with equivalent qualifications will be given priority. We intend to arrange future rounds of application periodically.
